EXPERTISE

- Management Skills
- Digital Marketing
- Programming (Basic)
- Critical Thinking
- Communication Skills

LANGUAGE

- English
- Hindi

PROFILE

Aspiring software engineer eager to gain practical experience through an internship. Skilled in programming, problem-solving, and IT systems, with a passion for innovation and learning in a professional environment.

PROJECTS

Phone Store App

Developed a comprehensive Python-based application to simulate a virtual phone store. The app featured functionalities such as browsing available phone models, adding products to a cart, calculating the total price, and generating bills.

Key Features:

- Interactive CLI (Command Line Interface) to enhance user experience.
- Incorporated object-oriented programming principles for modular design.
- Implemented error handling to ensure smooth execution and prevent crashes.
- Designed a structured billing system for customer orders.
- Learning Outcomes: Gained hands-on experience in Python programming, OOP concepts, and logical problem-solving.

Amazon Website Clone

Amazon Website Clone Created a responsive clone of the Amazon website using HTML and CSS to understand the principles of modern web design and development.

Key Features:

- Developed a visually accurate replica of Amazon's homepage and product pages.
- Utilized CSS for layout structuring, styling, and responsiveness.
- Focused on semantic HTML to enhance accessibility and SEO optimization.

ACHIEVEMENTS

- Achieved 86th place among 5,000 teams in the NEC E-Cell Task, a prestigious national competition centered on entrepreneurship and innovation.
- Established the inaugural Entrepreneurship Cell (E-Cell) at my college, nurturing a culture of innovation and an entrepreneurial mindset among students. Spearheaded initiatives aimed at promoting teamwork and enhancing creative problem-solving skills.
